a

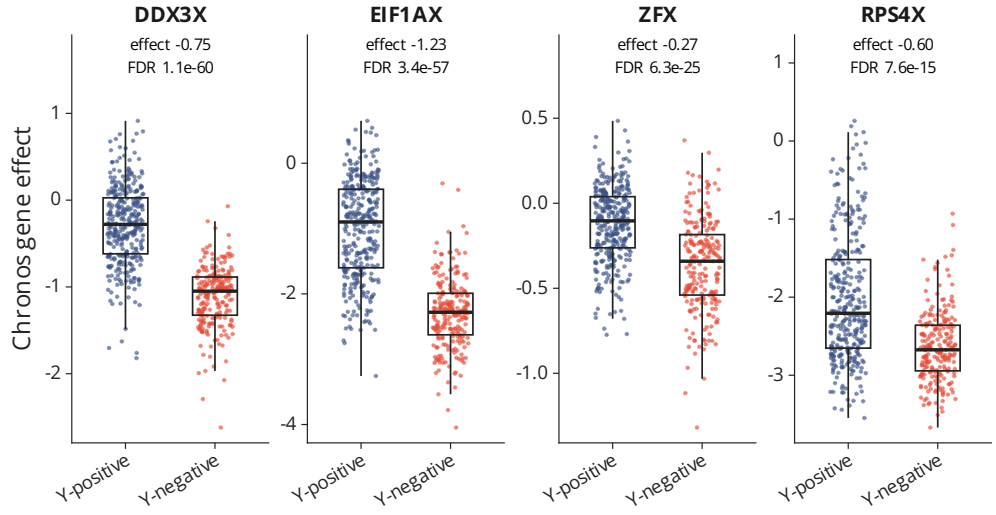

4 genes pass FDR 0.05, all X-linked partners of Y genes

17,205 genes; limma, lineage and library adjusted, donor blocked.
Negative: more dependent in Y-negative lines.

b

Each hit is a stronger dependency once the Y is gone

230 Y-negative and 338 Y-positive lines. Box: median and quartiles. Effect and FDR from the primary model.
