HT1080 | Fibrosarcoma

RRID:CVCL_0317

a Origin and background

Origin and donor

Pelvic tumour adjacent to the acetabulum
35-year-old man; no prior chemo-/radiotherapy
Established 1972; first reported 1974

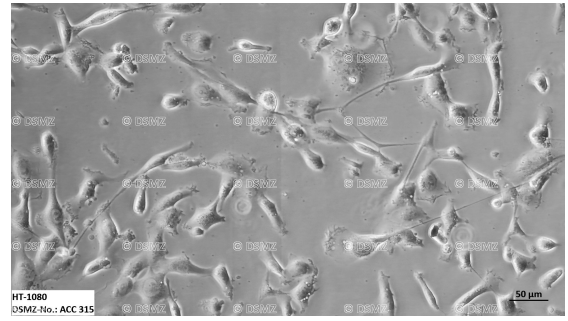

Growth and karyotype

Adherent monolayer; doubling time ~30 h (DSMZ)
Pseudodiploid; modal chromosome count 46

Reported genotype

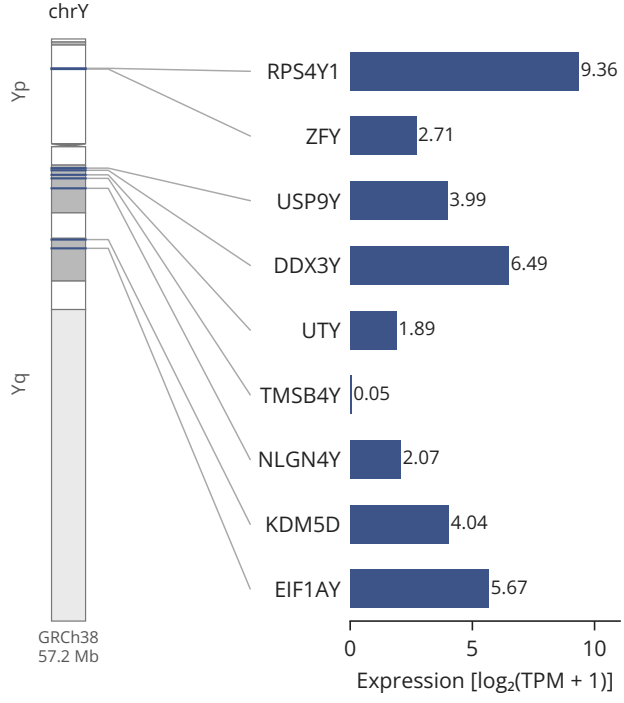

NRAS Q61K (heterozygous)
IDH1 R132C (heterozygous)
CDKN2A Deletion (homozygous)
TP53 WT (reported in ATCC-derived cells)

b Reference culture morphology
