

CN exclusion removes genes in copy-number-altered intervals.

**Gene-set theme**

- Interferon / inflammatory
- Epithelial
- G2/M
- Ribosomal
- Histone-associated
- Other
- Chromosomal-position sets

**After CN exclusion**

- Significant; same direction
- Not retained
- Unchanged NES

**139 / 154 retain significance and enrichment direction**

Filtered NES unavailable (4): chr20p11, chr20p12, chr20p13, chr11q24
