
Lower in Y-depleted
Higher in Y-depleted
FDR >= 0.05
a
Combined population difference
FDR < 0.05
Higher: 2,214
Lower: 2,460
-log10(BH-adjusted P)
Model log2 fold change
b
Agreement with descriptive effects
Pearson r = 0.979
Passage-aware model log2 FC
Descriptive mean log2 difference
c
Sensitivity to model choice
Pearson r = 0.953
Passage-aware model log2 FC
Batch + condition model log2 FC
d
Period-specific effects
Pearson r = 0.479
May model log2 FC
August model log2 FC
e
Voom mean-variance fit
Passage-aware
Batch + condition
Square root of residual SD
Mean log2 count
f
Raw P-value distributions
Passage-aware
Batch + condition
Genes (log scale)
10^3
Raw P value
