Higher in Y-depleted HT1080

Metascape rerun | 124 terms, 772 connections

$-\log_{10} P$

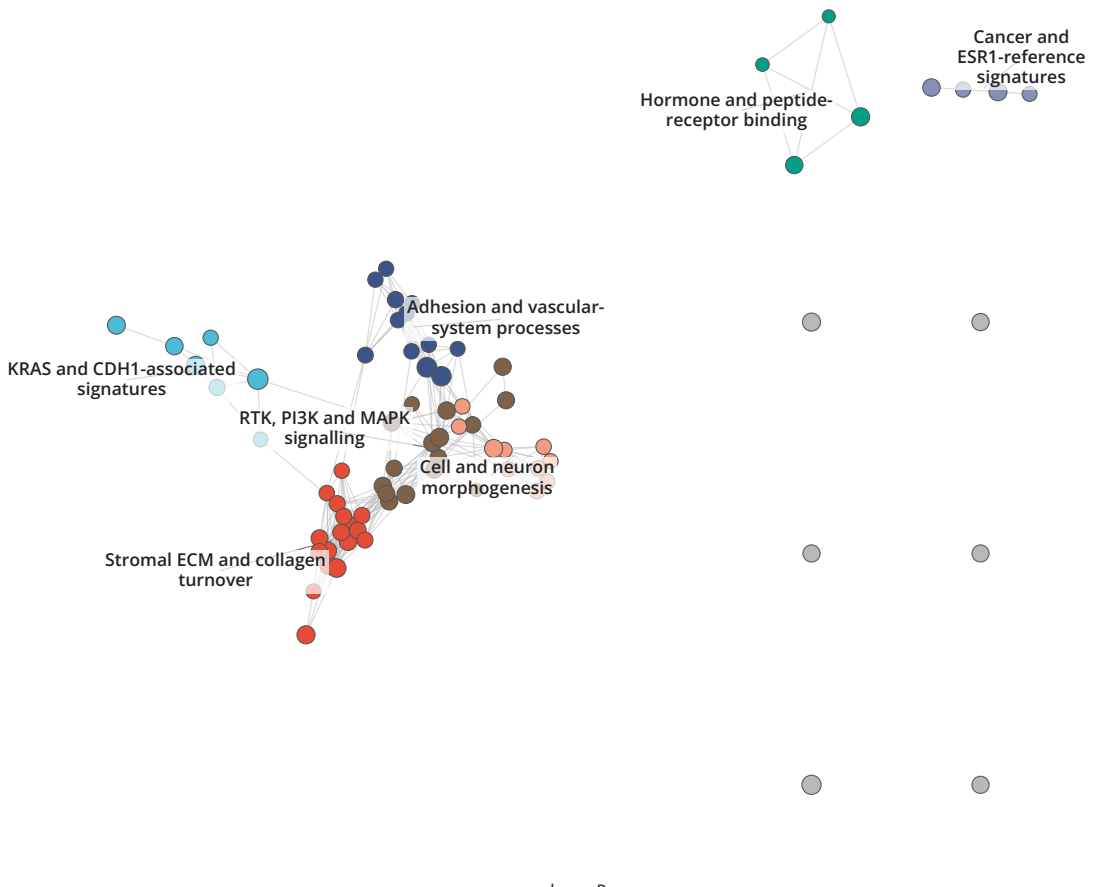

5 10 15

Theme	Terms	Best $-\log_{10}P$	Representative pathways	Recurring hit genes
GPCR and neuroactive-ligand signalling	15	12.8	GPCR ligand binding Signaling by GPCR	PTH1R, ADCYAP1R1, HRH2, AVPR2
Morphogenesis and chemotaxis	3	5.2	regulation of anatomical struc... chemotaxis	CCL2, FES, FGD5, GRIP1
Epithelial and cardiovascular development	33	9.9	epithelium development circulatory system development	IHH, BMP7, GATA4, WNT7A
Neurite morphogenesis	29	11.6	neuron projection morphogenesis plasma membrane bounded cell p...	CHRNB2, EPHB1, WNT7A, DRAXIN
Synapse organisation and neuronal signalling	28	7.5	synapse organization cell junction organization	NLGN4X, NRXN2, LRRC4B, ACTN2
Polycomb-associated promoter signatures	13	15.3	MCV6 HCP H3K27me3 MEF HCP H3K27me3	GATA4, PAX2, PDX1, SLC12A7
Epithelial and stem-cell signatures	3	6.7	LIM MAMMARY STEM CELL UP ONDER CDH1 TARGETS 2 DN	FEZ1, NSG1, PDPN, ITGB4

Grey denotes smaller or isolated communities. Node positions aid display; only connections are interpreted.

Lower in Y-depleted HT1080

Metascape rerun | 76 terms, 318 connections

Theme	Terms	Best $-\log_{10}P$	Representative pathways	Recurring hit genes
Adhesion and vascular-system processes	12	10.5	regulation of system process cell-cell adhesion	FGG, PIK3CG, MYL9, PLAT
Stromal ECM and collagen turnover	17	9.1	external encapsulating structure extracellular matrix	COL1A1, COL1A2, COL4A6, MMP1
Hormone and peptide-receptor binding	4	8.7	hormone binding peptide hormone binding	CALCRL, GLP2R, RAMP2, IL23R
Cell and neuron morphogenesis	10	8.6	cell morphogenesis neuron development	FGFR2, PTPRO, CNTN1, DPYSL5
KRAS and CDH1-associated signatures	7	11.6	SWEET LUNG CANCER KRAS DN PICCALUGA ANGIOIMMUNOBLASTIC L...	COL1A1, MYL9, KLF4, MARCKS
Cancer and ESR1-reference signatures	4	8.2	WALLACE PROSTATE CANCER RACE UP GOZGIT ESR1 TARGETS DN	IFI44L, MX1, CSTA, IFI27
RTK, PI3K and MAPK signalling	16	8.6	positive regulation of MAPK ca... growth factor binding	FLT4, KIT, FGFR2, INSR
Other isolated reference signatures	6	10.0	DURAND STROMA S UP CHANDRAN METASTASIS DN	See source table
