<– Enriched in pooled Y+
Enriched in LOY –>
Drug Metabolism Cytochrome P450 ***
Renal System Process Involved In Regulation Of Systemic Arterial Blood Pressure **
Adenylate Cyclase Inhibiting G Protein Coupled Receptor Signaling Pathway **
Metabolism Of Xenobiotics By Cytochrome P450 **
Phase I Functionalization Of Compounds ***
Maturity Onset Diabetes Of The Young **
Drug Adme **
Neuroactive Ligand Receptor Interaction ***
Embryonic Skeletal System Development **
Biological Oxidations **
Xenobiotic Metabolic Process *
Neuron Projection Guidance **
Amide Transport **
Hormone Transport **
Regulation Of Hormone Levels **
Regulation Of Response To Biotic Stimulus ***
Viral Process ***
Signaling By Interleukins ***
Interferon Signaling ***
Mtorc1 Signaling ***
Defense Response To Virus ***
Response To Virus ***
Rrna Metabolic Process ***
Epithelial Mesenchymal Transition ***
Rrna Processing ***
Ribosome Biogenesis ***
Inflammatory Response ***
Interferon Gamma Response ***
Tnfa Signaling Via Nfkb ***
Interferon Alpha Response ***
